Northstar Learning: Customer Growth Report

Reporting period: January–December 2025
Document type: Internal business research report
Purpose: Summarize customer growth, retention, and product engagement.

1. Executive Summary

Northstar Learning is a fictional online learning platform used here as sample data for testing document retrieval. During 2025, the platform's total number of registered customers increased from 20,000 in January to 23,000 in December. This represents a net increase of 3,000 customers, or 15% growth compared with the January baseline.

2. Customer Growth

The customer base grew steadily during the first half of 2025. Registered customers reached 21,200 by April and 22,000 by June. Growth slowed during the third quarter, then increased again in the final quarter. December ended with 23,000 registered customers. These figures describe registered customers, not monthly active users.

Measurement	January 2025	December 2025	Change
Registered customers	20,000	23,000	+3,000 (+15%)
Monthly active users	8,000	9,200	+1,200 (+15%)
Monthly subscription revenue	$160,000	$184,000	+$24,000 (+15%)

Table 1. Illustrative business metrics for the fictional Northstar Learning platform. Revenue values are monthly subscription revenue at the start and end of the reporting period.

3. Product Engagement

Monthly active users increased from 8,000 in January to 9,200 in December 2025. For this report, a monthly active user is a registered customer who completed at least one learning activity during a calendar month. The report does not provide data about course completion rates or average time spent studying.

4. Revenue

Monthly subscription revenue rose from $160,000 in January to $184,000 in December, an increase of $24,000 or 15%. The report does not include operating costs, profit, customer acquisition cost, or revenue by subscription tier. Therefore, revenue growth alone should not be interpreted as evidence of increased profitability.

5. Limitations

This sample report contains only selected year-end comparisons and a few milestones. It does not provide a complete monthly time series, regional breakdown, demographic analysis, customer churn rate, or causal explanation for the growth. Any answer about these missing details should state that the report does not provide the information.

6. Suggested Questions for Retrieval Testing

• How much did registered customers grow in 2025?

• How many monthly active users did Northstar Learning have in December 2025?

• What was the monthly subscription revenue in January and December?

• Does the report state the customer churn rate?

• Does the report explain why customer growth increased?

End of report. All company names and figures in this document are fictional and are provided solely for software testing and learning.
